

## Medical Aesthetics

Medical Aesthetic treatments are the fastest growing segment of skin treatments in the world. With virtually no down time, little or no pain, and treatments that really work, it's easy to see why they're so popular.

Whether you want to clear up or even out your skin tone, minimize or eliminate age spots, reduce fine lines and wrinkles, or tighten and improve your skin's overall texture and appearance, Medical Spa Treatments can help! Never before has it been easier to turn back the hands of time.

We invite you to set up a free consultation appointment to discuss the best treatments for you and your skin.

Treatments under medical supervision by  
Leslie Arwin, MD MPH

## Medical Laser Treatments

### IPL Photo Facial

IPL Photo Facial is an advanced rejuvenation treatment that can erase unwanted skin discolorations and blemishes giving your complexion a smooth, rejuvenated and youthful look. During the treatment, light & RF energy is applied to the skin where it is selectively absorbed by the darker pigments in the skin. IPL Photo Rejuvenation is effective for removing red and brown "age" spots, rosacea-redness, sun damaged skin, freckles and much more.

**IPL Photo Facial Treatment - \$250**  
**Packages Available**

### Skin Tightening & Wrinkle Reduction

A brand new treatment that safely works both on the surface and deep in the skin to stimulate new collagen growth. This treatment will improve skin elasticity, tighten loose skin on the face and neck, and reduce fine lines and wrinkles. Skin texture can also be smoothed out by the tightening and firming effect. This is an amazing treatment!

**Skin Tightening Treatment - \$350**  
**Package of 5 - \$1400**

### Laser Hair Removal

To eliminate unwanted hair safely, easily and conveniently. Forget the pain and hassles of waxing, shaving, creams or tweezing – Laser Hair removal is effective at permanently reducing hair growth anywhere on your body. For individuals that are not candidates for Laser Hair Removal we also offer electrolysis.

**How laser hair removal works?** Light and Radio Frequency energy passes harmlessly through your skin and is absorbed by the melanin (pigment) in the hair follicles. Heat generated by the light and RF energy breaks apart the follicle. Over the next 7-10 days, hairs gradually fall out.

### Glycolic Peels

Glycolic acid is made from sugar cane and is used to gently remove dead or dying skin. Exfoliation increases circulation and stimulates the regenerative process reducing the appearance of fine lines, wrinkles and other skin conditions. We offer 30-70% Glycolic Peels that can only be found in offices under medical supervision.

**Glycolic Peel Treatment - \$60**  
**Package of 6 - \$300**

### Salicylic Peels

Salicylic acid is made from the willow tree and it penetrates deep into the skin to clean pores of excess sebum and dirt, while detaching dead cells from the layers underneath to allow for new skin cells to grow instead. Salicylic Peels come in different strengths and can be individualized for your specific skin care needs.

**Salicylic Peel Treatment - \$80**  
**Package of 6 - \$400**

### Microdermabrasion

Microdermabrasion is a non-invasive, exfoliating treatment that removes the dead outer layer of your skin to reveal new, healthy skin cells. It works by directing a stream of tiny crystals over the skin's surface. This technique uses both pressure and suction to remove dead skin cells, leaving a polished, revitalized complexion.

**Microdermabrasion Treatment - \$100**  
**Package of 6 - \$500**

### Micro-Peel Treatment

By combining mechanical microdermabrasion and chemical glycolic peels into a 2-step treatment, we have found that you can achieve superior results than either treatment separately. This treatment produces immediate results, but is not overly harsh. As with all the Med Spa treatments, in order to stimulate the skin to rejuvenate itself, multiple treatments are needed.

**2-Step Micropeel Treatment - \$115**  
**Package of 6 - \$575**

### 3-Step Treatment

A gentle and safe skin resurfacing treatment that combines our Micro-Peel with an ultrasound treatment to help repair facial skin that has been exposed to the harsh elements we face on a daily bases.

**3-Step Treatment - \$125**  
**Package of 6 - \$625**
